

Case Studies

LARGE NEW BUILD, BUCKINGHAMSHIRE

Brill Sawmills supplied and installed over 600m² of quarter sawn solid European oak flooring into this prestigious project and then hand finished the floor with a hard wax oil. We also supplied all the bespoke solid oak doors and an handmade staircase to the property.

NEW BUILD, HERTFORDSHIRE

Brill Sawmills supplied and installed 130m² prime grade, European oak, engineered flooring over underfloor heating. The doors throughout the property were bespoke solid European oak and the staircase was solid American white oak with glass balustrades and oak newels, all supplied and fitted by Brill Sawmills.

NEW BUILD, OXFORDSHIRE

All the oak floors, internal doors, windows, external joinery and the staircases in this project were supplied and installed by Brill Sawmills. We also supplied and fitted all the oak skirting boards, architraves and door linings along with 120m² of Ipe decking.

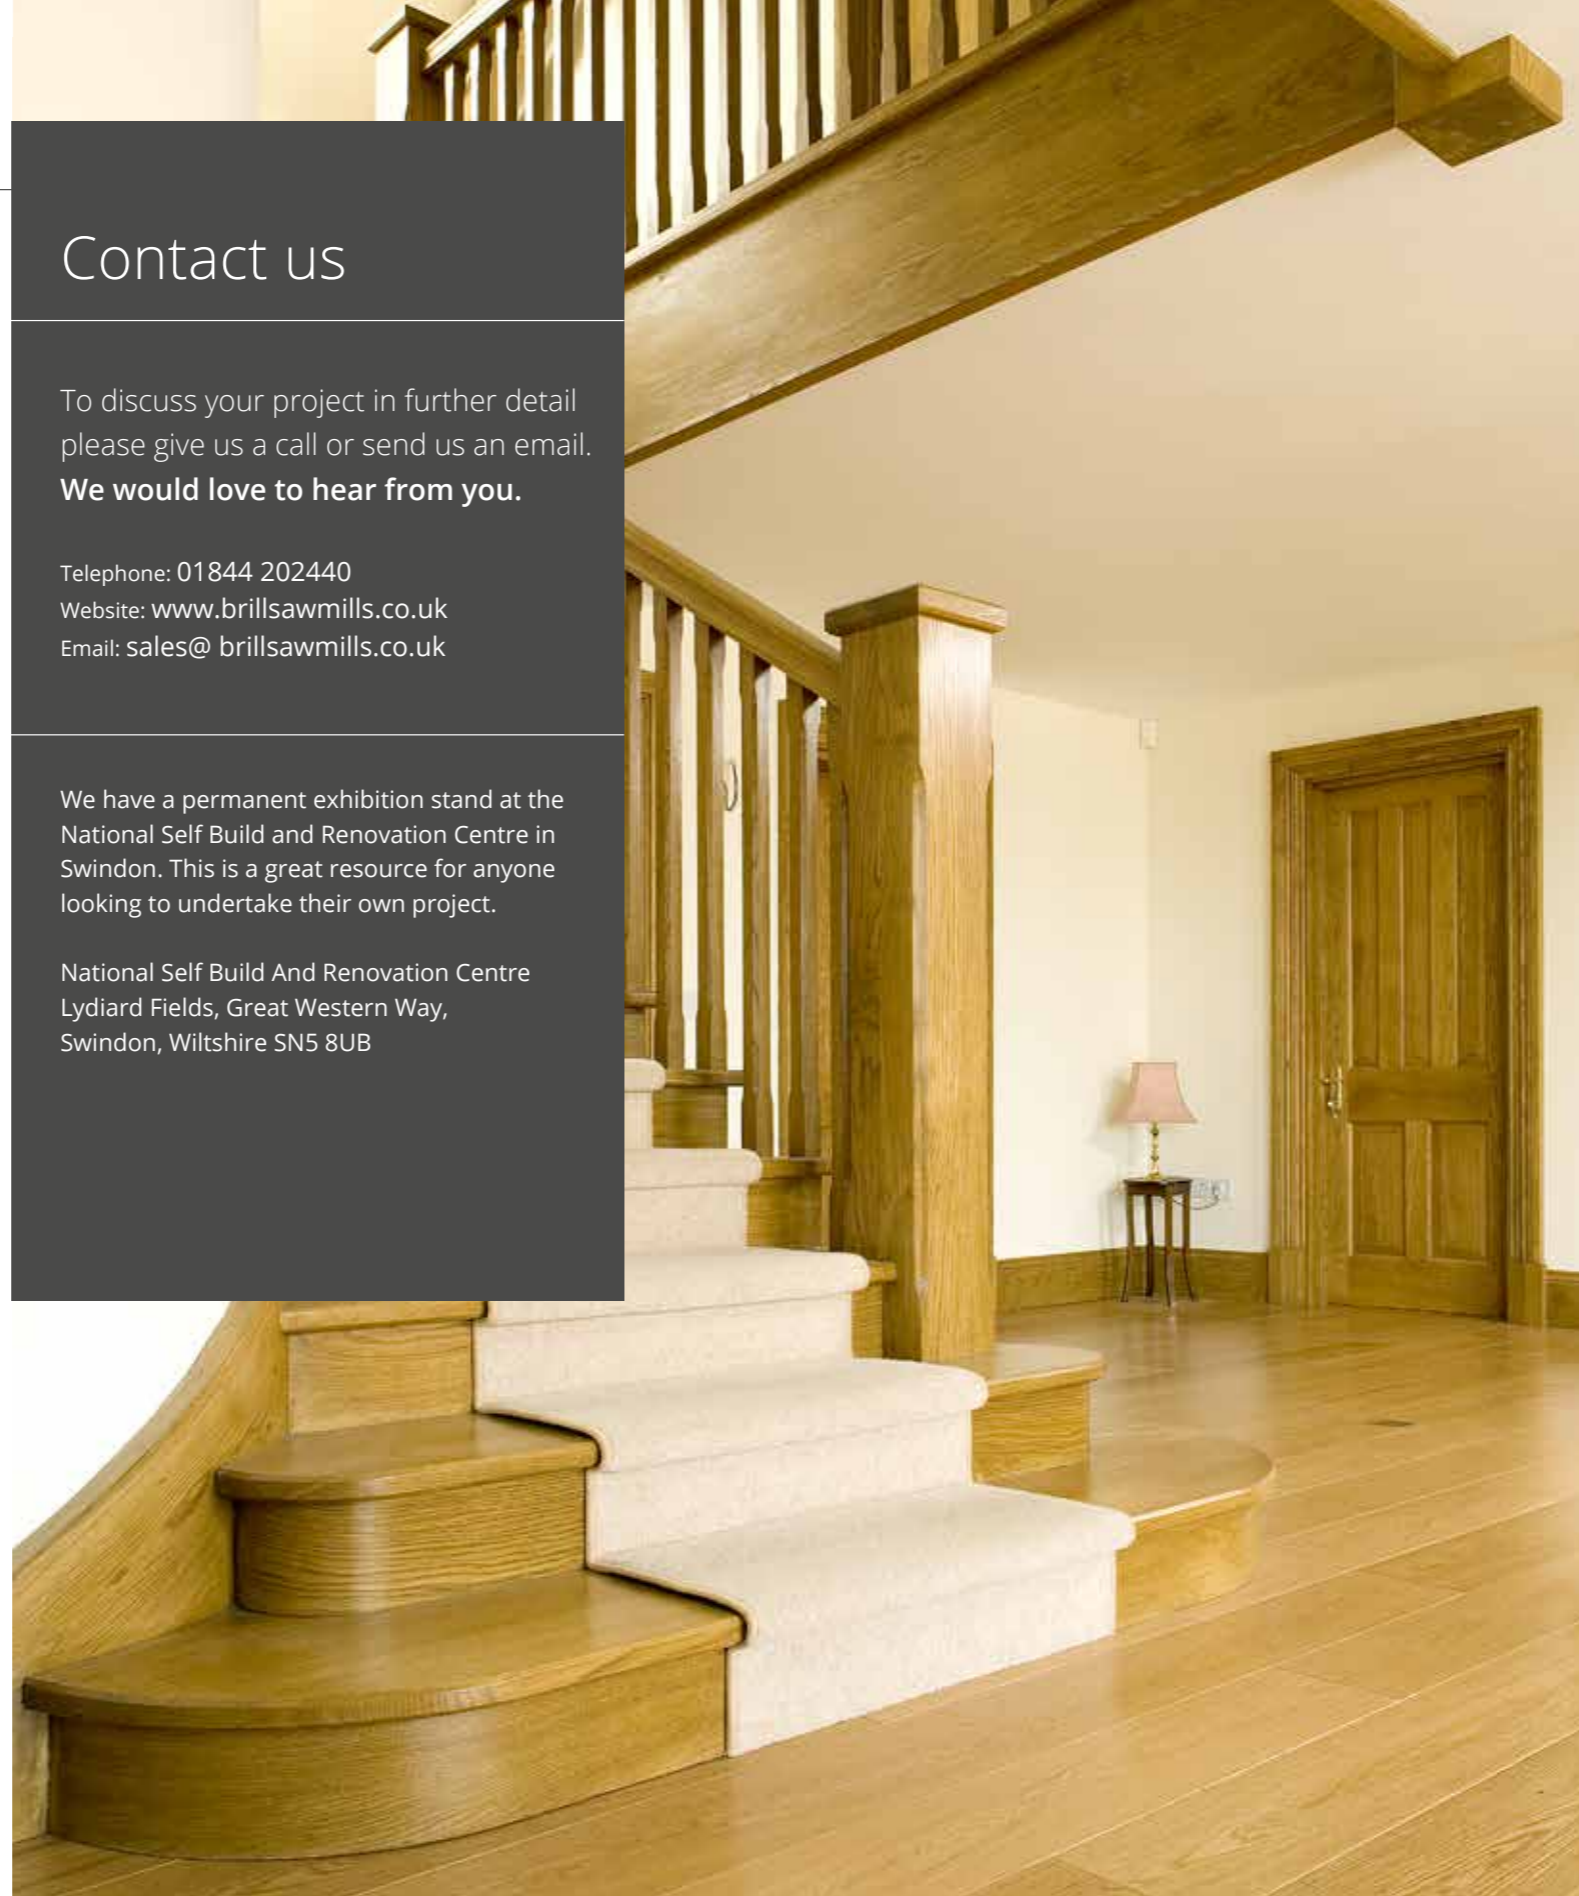

Contact us

To discuss your project in further detail please give us a call or send us an email.
We would love to hear from you.

ABOUT US

Brill Sawmills

More than just wood. If you are a Self-builder, Homeowner, Developer, Architect, Builder, Project Manager or Interior Designer then we have a lot to offer you.

WHO WE ARE

Brill Sawmills is a highly experienced family business and recognised expert in both Self-Build projects and Renovations. We are a highly recommended & competitively priced supplier of Windows, Staircases, Floors and Doors.

WE SUPPLY AND INSTALL

- > High performance uPVC, Aluminium, Aluminium Clad, Timber painted, European Oak and Passive windows
- > Beautiful traditional and contemporary staircases
- > An extensive range of internal and external doors
- > Engineered hardwood flooring for underfloor heating.

Founder and Managing Director Tony James started Brill Sawmills 15 years ago with the desire to take quality products direct to the end user. Prior to this, throughout his extensive career, Tony gained personal access to the UK's and Europe's finest manufacturing businesses. Tony's vast experience, along with his dedicated team of highly qualified professionals, are the foundations of Brill Sawmills' success.

WHAT WE DO

Without a doubt, the greatest added value and saleable features you can put in a property are the Windows, Stairs, Doors and Floors.

Brill Sawmills offers a complete turnkey solution by sourcing suppliers, manufacturing bespoke products of the highest quality and managing installation via a team of carpenters and joiners. Our ability to mix and match several suppliers to suit your needs means your vision can be realised at a highly competitive rate via a **single point of contact - Brill Sawmills!**

Whether your project is traditional or contemporary we have the solution for you. Delivered on time and to budget.

"Everything that you have supplied: windows, sliding patio doors, internal doors, oak front door, architraves, wainscoting and finally our lovely oak staircase balconies and gallery – have been superb."

David Moore, Saffron Walden

Brill Sawmills offer a wide range of window solutions: High performance uPVC, Aluminium, Aluminium Clad, Timber painted, European Oak and Passive windows with u-values as low as 0.47w/m2k.

Windows

SUPPLY & INSTALLATION WITHIN 7-15 DAYS OF ORDER

Our complete range of windows is manufactured under ISO9002 quality systems. These are delivered to site in 7-15 days of sign-off. With Brill Sawmills you can plan your building schedule accurately, resulting in considerable savings.

We supply and install a wide range of bespoke hardwood staircases, from traditional to contemporary designs. All our staircases can be complemented either by bespoke hardwood spindles and handrails for that traditional look, or, with stainless steel and glass to produce a unique, contemporary design.

Stairs

TRADITIONAL SOLID OAK

We offer a comprehensive range of standard profile balusters and newel posts from simple, square newels and spindles to a more ornate turned and fluted. Our staircases are all handmade and we can mill sections to your design to achieve that unique look.

Brill Sawmills offer a range of door solutions for every project. Stylish and hardwearing, our doors are manufactured to order, to your exact requirements and to the highest standard. Let us help you to create the look to compliment your project.

Doors

OFF THE PEG

We offer an 'off-the-peg' solution for standard sized doors and we act as distributors for some of the biggest door importers in the UK including Todd Doors, JB Kind and XL Joinery, offering a wide range of discounted standard engineered doors.

We have an unrivalled supply chain that stretches across the world, importing most of our flooring ourselves. Hardwood flooring comes in a wide range of species, grades, sizes and finishes, in both solid wood and also engineered - suitable for underfloor heating. Let us help you find the floor you always dreamed of.

Floors

SOLID WOOD FLOORING

We offer a wide range of solid wood flooring in both parquet and plank. Solid wood floors can either be fully glued to the floor or secret nailed. You can refinish, or recoat solid wood floors several times, which adds to their appeal and to their long life.

OAK SOLUTION

All our solid European oak joinery is sourced from plantation forest and laminated for greater performance and dimensional stability. This also ensures a higher proportion of wood from each tree is used, decreasing environmental impact.

CONTEMPORARY OAK AND GLASS

We can accommodate a whole range of styles and designs, in stunning prime grade oak, complimented by the sleek beauty of glass. We offer a range of toughened glazing options, patterns and fixings.

BESPOKE SOLID EUROPEAN OAK

At Brill Sawmills we can produce an enormous variety of solid oak doors through our bespoke joinery service, to your design and to non-standard dimensions for that extra special look. We will help you through the design process, ensuring the design is structurally stable and aesthetically balanced.

ENGINEERED WOOD FLOORING

Engineered floors are far more stable than solid floors. With only a fraction of the movement of a solid board they are eminently suitable for use with underfloor heating systems. Engineered flooring can either be fully glued down, secret nailed or floated and typically has the same life expectancy of a solid board.

IN PARTNERSHIP

As the exclusive trading partner of one of Europe's largest manufacturers of energy efficient Windows and Doors in the Self Build Market, we're experienced in working 'hand in hand', assisting self-builders in their journey to building their dream home. **We offer the lowest installed window cost in the industry!**

STAINLESS STEEL OR SOLID GLASS

When something a little 'Grand Designs' is called for, we have the solution. We offer the finest designs incorporating glass and steel. The staircase in the picture was supplied and installed to a beautiful property in Henley-on-Thames, just one example of the 'wow' stairs we have produced.

OVERSIZE DOOR SET SOLUTIONS

For that high value project Brill Door Set Solutions can manufacture unique pre-hung doorsets in a range of veneers and finishes, incorporating the frame, architraves and ironmongery - including secret concealed hinges. All delivered to site, pre-finished and ready for installation.

UNDERFLOOR HEATING

We are experts in wood flooring used in conjunction with underfloor heating and we are happy to offer free advice and guidance on the subject. We can supply data about the thermal resistance and conductivity against the floor you choose.
